e-mail address

y-nakagaichi@fukui-ut.ac.jp

Main research themes and their characteristics

「Theme Volleyball Game Analysis」

Using DATAVOLLEY (Data Volleyball), the world standard analysis software in volleyball, we will provide effective support for the University's junior high school girls to university teams by conducting technical and game analysis, and at the same time, by analyzing international matches at the Japanese national team level, we will improve Japan's international competitive ability.

「Developing the human resources you need」

The discovery and cultivation of excellent athletes is based on the coaching of students with enthusiasm and wholehearted devotion to everything they do. We are committed to developing athletes who will go on to the world stage, utilizing our experience in the sport of volleyball, which we have worked so hard for, and we are also committed to educational activities aimed at improving the students' personal abilities so that they will become the kind of people who are sought after when they leave the sport and enter society.
